

June 2, 2021

Dear Valued Customer,

The overall strong economic demand, coupled with the major supply chain disruptions continues to spike raw material cost to unprecedented levels as we exhaust all efforts to meet your needs.

Accordingly, MKS Plastics is forced to announce a price increase of \$0.21 per pail effective with orders shipped on or after June 15, 2021.

We appreciate your understanding as market conditions outside of our control, including significant cost escalations with transportation, require us to act accordingly in order to maintain our level of service and commitment to you.

If you have any questions, please don't hesitate to contact your MKS sales representative.

Thank you for your business!

Sincerely,

Arthur Thompson Jr.
